Find the Right Fit

1. Print out this guide and place it on a flat surface. Have your child stand on the paper with their heel and longest toe centered on the line. (For babies and walkers, you may need to hold the paper up to their feet.)

2. Place a mark on the line at the longest toe and back of the heel.

3. Measure the distance between the marks and use the conversion chart to find their shoe size.

4. Measure both feet. If one foot is larger than the other, fit to the larger foot.
